- (a) The growing development of online functionality for console games has led Activision Blizzard to believe that online functionality, along with its obligation to ensure durability, constitutes, for certain games, a service forming an integral part of the game itself. In this case, Activision Blizzard does not account separately for the revenues linked to the sale of the boxed software and those linked to the online services because it is not possible to determine their respective values, the online services not being charged for separately. As a result, the company recognizes all of the revenues from the sale of these games ratably over the estimated service period, usually beginning the month following shipment.
